

JD6101RG

Acrylic Double Sided Tissue Tape

Description:

JD6101RG is a double-sided non-woven tape equipped with the acrylic adhesive. The conformable non-woven tape is especially designed for general purpose lamination applications. The acrylic adhesive is temperature resistant up to 110°C and offers very good bonding strength on various substrates, including materials with low surface energy.

Features:

- High tack; adheres well to various surfaces such as plastics, metals, papers, and name plates.
- Easily torn by hand; convenient to use.
- Good long term ageing
- Good UV resistance
- High initial grab and tack

Application:

- Bonding engraving laminates
- Ideal for high temperature applications
- Mounting graphics and directional signs
- Sail making and canvas cover manufacture
- Bonding synthetic fabrics
