

JD990D

DOUBLE SIDED FIBERGLASS MESH TAPE

Description:

JD990D tape is a double-sided glass fiber mesh tape, compatible with UP, EP and VE resin. It serves to hold reinforcements in place during closed-mold processes such as inwind blade production. It maintains reinforcement into the mold and is specially adapted for large parts and complex/vertical geometries e.g. for wind mill blades or in the marine market.

Easytape can be placed in specific zones.

No solvent emissions when laying.

Application:

Hold reinforcements in place during closed-mold processes

Jiuding Tape

Technical Datasheet

Specification:

Backing: Fiberglass Mesh

Adhesive Type: SB+Acrylic

Color: White

Weight (g/m²): 75

Weave: Leno

Structure (threads/inch) : 9X9

Break Strength(N/inch): 500

Elongation (%) : 5

Latex content(%): 35
